

2020 Snake River Salmon Recovery Board Project Application

Complete Application Checklist Summary:

Through the application process each of the following elements, depending on the project type, will need to be created and submitted at some point before the final application due date.

- ÿ Local Snake River Salmon Recovery Board Application – this does not need to be submitted in PRISM, but is required and will assist in finalizing a complete application – many elements including the project title, description, property details, etc., can be copied and pasted throughout. The SRSRB Application includes this entire form, the partial draft application, draft application, and final application sections.
- ÿ Three maps: 1. a general vicinity map, 2. a detailed worksite map for planning and restoration projects or a parcel map for acquisitions, and 3. a map showing the project’s Area of Potential Effect with the section, township, and range identified.
- ÿ A minimum of two site photographs in JPEG file format.
- ÿ The proposed project design including plans, specifications, and a design report if available (for restoration projects only).
- ÿ Detailed Cost Estimate.
- ÿ Landowner Acknowledgement Form (found in RCO Manual 18).
- ÿ Barrier Evaluation Form (fish passage construction and design projects only).
- ÿ Correction Analysis Form (fish passage construction projects only).
- ÿ Intensively Monitored Watershed Certification (when relevant).
- ÿ Waiver of Retroactivity (for acquisition projects only).
- ÿ Deliverables from prior phases of the project (when relevant).
- ÿ Project partnership contribution form (when relevant, found in RCO Manual 18).
- ÿ Salmon Recovery Funding Board Application Authorization Form
- ÿ RCO Fiscal Data Sheet
- ÿ RCO Applicant Resolution/Authorization Form
- ÿ Complete required elements of PRISM Online Application:
(<https://secure.rco.wa.gov/Prism/Sponsor/Account/LogOn>).

Please contact the Snake River Salmon Recovery Board Lead Entity office for questions or assistance with the application and application process at 509-382-4115 or Ali@snakeriverboard.org.

Project Description

Must be less than 1,500 characters including spaces.

Important Note:

Many audiences, including the Salmon Recovery Funding Board (SRFB), SRFB's Technical Review Panel, media, legislators, and the public who may inquire about your project, use this description. Provide as clear, succinct, and descriptive an overview of your project as possible – many will read these 1-2 paragraphs! This project description will be used in your online PRISM application and can be used in the Salmon Project Proposal, please take your time to craft a well written project description.

Your description needs to include the following:

- Who is sponsoring the project
- Type of project (acquisition, restoration, development, design)
- Location information
- Overall specific goal to be achieved and why it is important to do at this time
- Primary type of habitat to be protected or restored and to what extent the project will protect, restore, and/or address salmon habitat
- Priority species supported
- Primary outdoor recreation opportunity to be provided if relevant
- What will be acquired, restored, developed, and/or designed with grant funds

Example of a Project Description:

The Jones Nonprofit will use this grant to acquire approximately 20 acres to protect salmonid habitat. Five of these acres will be restored. The property is located in B County, adjacent to Liquid Creek, east of Highway 1101. The acquisition will help conserve the ecological integrity and biological diversity of the Liquid Creek watershed by protecting parcels containing critical riparian habitats and linking these parcels to existing public lands. The primary habitat that will be protected is riparian and in-stream habitat. Approximately 20 acres will be acquired, 10 acres of riparian and wetland habitat and 10 acres of adjacent upland. Five of the riparian acres will be restored by planting native vegetation. The primary species supported by these habitats are Endangered Species Act listed anadromous fish including coho, summer and fall Chinook, chum, and steelhead.

This acquisition has been identified as a high priority for B County, and the protection of functioning habitat is the highest priority in the Northwestern chapter of the Salmon Recovery Plan. The Jones Non-Profit group has

worked closely with B County, the local school district and the Friends of Liquid Creek to secure funding and other support for this project. The University of Fun Education has agreed to conduct the baseline study and develop a restoration plan. This project builds upon the Land Trust's adjacent land holdings and the Liquid Creek Preserve which has already conserved 45 acres and 3,700 feet of Liquid Creek

The PRISM database limits project descriptions to 1500 characters (including spaces); any excess text will be deleted. Additional detail should be provided in the project proposal!

Your Project Description:

Walla Walla County Conservation District proposes to create final engineering designs for a fish habitat restoration project. This project is located in Walla Walla County, on the Touchet River at river mile 41.5-42.5, approximately ½ mile below the confluence of the Touchet River and Coppei Creek, 1 mile west of the city limits of Waitsburg. The proposed project reach is located within the Touchet River MSA, Priority Restoration Reach and a Major Spawning Area for ESA listed Mid-Columbia River DPS Steelhead as identified in the Snake River Salmon Recovery Plan (2011). This is also designated a critical habitat for Bull Trout by the US Fish & Wildlife in 2010.

The overall goals are to develop an engineered design that will ultimately restore natural riverine processes including increased channel roughness elements, promote sediment sorting and storage and create a dynamic floodplain and instream environment with complex side channels and large wood features. The project, when constructed, will provide Mid-Columbia steelhead adult holding and juvenile rearing habitat, bull trout overwintering habitat, and non-ESA listed spring Chinook passage and holding habitat. This design would augment four other major restoration projects already completed in this reach. Those projects include; Touchet River Mile 42.5 Habitat Enhancement, Prism # 07-1527, and is adjacent and upriver of the Touchet River McCaw Reach Projects Phases A (11-1580), B (16-2099) & C (19-1461)

Project Proposal Cost Estimate

Please provide a detailed cost estimate required by PRISM (it is easiest to align the cost estimate you create with the cost fields from PRISM). Applicants must use the existing template, and in general, restoration and design project cost estimates should separate costs for individual construction, design, and project administration elements and tasks (e.g., survey, design, permits, cultural resources, materials, labor, and equipment). Acquisition projects should include costs for land, incidentals (including, as appropriate, appraisals, review appraisals, hazardous substance assessment, title reports and insurance, baseline documentation for conservation easements, closing, recording fees, wetland delineation, fencing, signing, taxes), boundary survey, cultural resources review, demolition, noxious weed control, relocation, stewardship plan, and project administration. Contingency costs should NOT be included as a separate line item in the attached cost estimate. For more information and eligible costs, see RCO Manual 18.

Note: As of November 2017, the Snake River Salmon Recovery Board approved the SRFB funding guideline of a \$400,000 SRFB request cap (15% minimum match per SRFB requirements) with a 50% match required for the amount of funding requested above \$400,000, with a \$750,000 maximum request. As an example, a \$400,000 SRFB request would require a minimum 15% match, or \$71,000 for a total project cost of \$471,000 (note that the match percentage is calculated based upon the total project cost, not the SRFB request). A \$600,000 project would require the \$71,000 plus an additional \$64,500 for a total match amount of \$135,500 and the SRFB request being \$464,500.

Application Example		
Total SRFB Request	\$	464,500
Total Match	\$	135,500
Total Project Cost	\$	600,000
First \$400k SRFB Request	\$	400,000
Match for first 400k (15% of first \$400k total)	\$	71,000
Total for first \$400k SRFB Request	\$	471,000
Total cost minus first \$400k/15% match component	\$	129,000
SRFB Request above \$400k	\$	64,500
Additional Match above \$400k (50%)	\$	64,500

For this section, you must use an existing template cost estimate which can be found on the SRSRB website at: <http://snakeriverboard.org/wpi/salmon-recovery/lead-entity-committee/grant-applications/>

Restoration Project Preliminary Design Requirements

Starting in 2013, the SRFB changed the requirement for design review of restoration projects which exceed \$250,000 in SRFB requested funds. If your grant request from the SRFB will exceed \$250,000 you will be required to submit a preliminary design or equivalent with the final application. Check the SRFB Manual18 (Appendix D) for information of the Design Requirements or contact LE Staff.

Please check the appropriate box below as to whether the design requirement can be met.

I have preliminary designs completed and have cross walked them w/ SRFB requirements	<input type="checkbox"/>
I am currently working on preliminary design and may be able to complete by final application deadline	<input type="checkbox"/>
I do not have preliminary designs and will not have them by the final application	<input checked="" type="checkbox"/>

Evidence that this project is part of the Snake River Salmon Recovery Plan:

List the HWS project number and the title of the project as stated in the Snake river Salmon Recovery Region Provisional Work Plan 2013-2018. If project is not directly stated in the Work Plan, list the general project category your project pertains to and describe the correlation.

Work Plan Number(s):

32-MT

Vicinity / Site Maps & Photos

*Please submit **photos as JPEG** or other non PDF picture format. Maps and designs maybe submitted in photo or PDF format. If maps and photos were submitted with the pre-application, re-submit only if*

Letter of Intent Due Date: December 9, 2019
 Partial Draft Application Due Date: January 31, 2020
 Draft Application Due Date: March 4, 2020
 Final Application Due Date: June 18, 2020

<i>they have been updated.</i>	
	Attached

Detailed Worksite Map (planning and restoration projects) or parcel map (acquisition projects)	<input checked="" type="checkbox"/>
Map showing the project's Area of Potential Effect (APE) with Section/Township/Range	<input checked="" type="checkbox"/>
A minimum of two (2) Aerial or Site Specific Photos Attached	<input checked="" type="checkbox"/>
Designs (conceptual, preliminary, or final) or Field Sketches	<input type="checkbox"/>

<p>Salmon Recovery Funding Board Partial Draft Application Information</p>
<p>Date Submitted to SRSRB :Submitted</p>
<p> </p>

This is the end of the Partial Draft APPLICATION

When submitting your draft application, make sure to update the partial draft application information where required as well as completing the following draft application. The partial draft application will become part of the draft application to reduce redundant forms.

DESIGN PROJECTS

The costs on this page are for design projects, not for the design phase of a restoration grant.

[See Manual 18, Appendix D for additional information regarding allowable costs.](#)

				OVERALL PROJECT	GRANT REQUEST	MATCH			
				<i>Budget must account for all costs to complete the project</i>	<i>Enter only the amount of the grant request</i>	<i>The Grant Request and Match should equal the total project cost and Budget Check cell should be 0. Sponsors must account for all sources and types of match need to complete the project.</i>			
				Amount	Amount	Match	Funding not reported in PRISM	Source (Grant, Cash, Materials, Labor, Volunteers, etc)	Match Type (federal, state, local)
Design Costs									
Category	Task Description	Qty	Rate						
Survey	<i>Site Review, Visual Survey,</i>	160.00	\$ 85.00	\$ 13,600	\$ 13,600	\$ -	\$ -		
Assessments (hydraulic, sediment)	<i>WinXSPRO sediment modeling</i>	75.00	\$ 85.00	\$ 6,375	\$ 6,375	\$ -	\$ -		
Geotechnical assessment	<i>Geologist, equipment and report.</i>	1.00	\$ 5,000.00	\$ 5,000	\$ 5,000	\$ -	\$ -		
Preliminary design	<i>for Panel review</i>	200.00	\$ 85.00	\$ 17,000	\$ 17,000	\$ -	\$ -		
Final design	<i>Design, Design Report and Engineer's estimate</i>	100.00	\$ 85.00	\$ 8,500	\$ 8,500	\$ -	\$ -		
Other	<i>Engineering Technician</i>	300.00	\$ 42.00	\$ 12,600	\$ 12,600	\$ -	\$ -		
Administrative	<i>Grant admin, etc.</i>	100.00	\$ 35.00	\$ 3,500	\$ 3,500	\$ -	\$ -		
Data collection	<i>Riparian habitat survey, assessment and report</i>	40.00	\$ 40.00	\$ 1,600	\$ 1,600	\$ -	\$ -		
Cultural resources	<i>Cultural resources</i>	1.00	\$ 6,000.00	\$ 6,000	\$ 1,000	\$ 5,000	\$ -
